

Nulon Products is an Australian company who manufacture and distribute a large range of Automotive Oils for Engines and Transmissions and Additives for Engines, Transmissions, Power Steering systems, Fuel Systems and Cooling Systems. They also distribute a range of automotive service spray products.

Nulon Green Long Life Concentrated Coolant (LL) is the ultimate cooling system protection you can provide for your vehicle. It contains the latest Hybrid Additive technology (HAT) anti-corrosion chemicals which provide maximum protection for up to 4 years or 250,000km (whichever comes first). Guaranteed safe to use in all vehicle cooling systems.

Does your car engine rattle or make a tak, tak, tak noise on start-up? Lifter-Free & Tune-Up will help. It dissolves and dislodges harmful varnish and carbon deposits that accumulate within and around hydraulic lifters and cam followers without causing any damage to oil seals or gaskets

Nulon Radiator Stop Leak (R50) stops leaks fast in radiators, heater cores and welch plugs. Nulon R50 is compatible with all coolant types. R50 contains tiny particles of aluminium, brass and cellulose fibre. These particles block up cracks and leaks and set hard - like a ceramic seal.
